Welcome to the New SMARTS Era

What is SMARTS?

- **SMARTS** is a multi-chain MEV trading ecosystem that runs 24/7 across Solana, Ethereum, BSC, and Base, executing real on-chain arbitrage and sandwich trades automatically.

SMARTS Engines

Sandwich Bot

Function:

Captures value from transaction ordering and liquidity movement.

Strategies Used:

- 🔌 Sandwich and backrun execution
- 🔌 Priority transaction ordering
- 🔌 Aggregated MEV extraction

Strength:

Optimized for active, volatile markets with protected execution.

Atomic Arbitrage Bot

Function:

Captures risk free price differences across DEXes.

Strategies Used:

- 🔌 Cross DEX arbitrage
- 🔌 Multi hop routing
- 🔌 Profit or revert atomic execution

Strength:

Zero slippage, zero market risk, fully automated.

SMARTS Roadmap

Q1

Solana

First deployment of Sandwich Bot on Solana

- Tested algorithms, gathered user feedback, and improved core trade logic.
- Laid the groundwork for a more scalable, flexible engine.

Q2

BSC

Dual-Network Activation

- Expansion to Binance Smart Chain.
- Boosted trade efficiency, unlocked low-fee MEV capture.

Q3

EVM Chains

Multi-Chain Launch

- Extending SMARTS' reach across major ecosystems.
- Broader liquidity access. higher daily returns, tapping into diverse on-chain venues.

Q4

Atomic Arbitrage

Atomic Arbitrage

- Atomic arbitrage buys low and sells high in one on-chain transaction. No profit, no execution.

ALL COMPLETED

2026 - Taking Flight

APIs 
Open APIs to approved partners, enabling ecosystem growth and deeper integrations.

Enterprise 
Test, evaluate routes, and co-deploy strategies in a secure sandbox environment.

Governance 
Launch of SMARTS Governance, giving the community a direct voice in platform decisions.
