# Welcome to the New SMARTS Era

## What is SMARTS?

- **SMARTS** is a multi-chain MEV trading ecosystem that runs 24/7 across Solana, Ethereum, BSC, and Base, executing real on-chain arbitrage and sandwich trades automatically.

# SMARTS Ecosystem

## Blockchain Transactions

- Sandwich bot detects large pending trades in the mempool

## Frontrun & Backrun Orders

- Sandwich bot executes buy before and sell after the main trade

### Sandwich Strategy

## Profit Extraction

# Prediction Market Launch on SMARTS

Launching 1 April 2026

SMARTS is officially introducing Prediction Markets powered by AI, bringing a new layer of opportunity into the ecosystem.

## What this means for users:

- Live access to Prediction Market opportunities
- Fully automated analysis and execution
- Participation through structured contracts
- Real-time interaction within the platform

Estimated Performance Range: **18% – 36%** per month

# How SMARTS PM Bot Works

The SMARTS PM Bot combines analysis and execution into a single automated system.

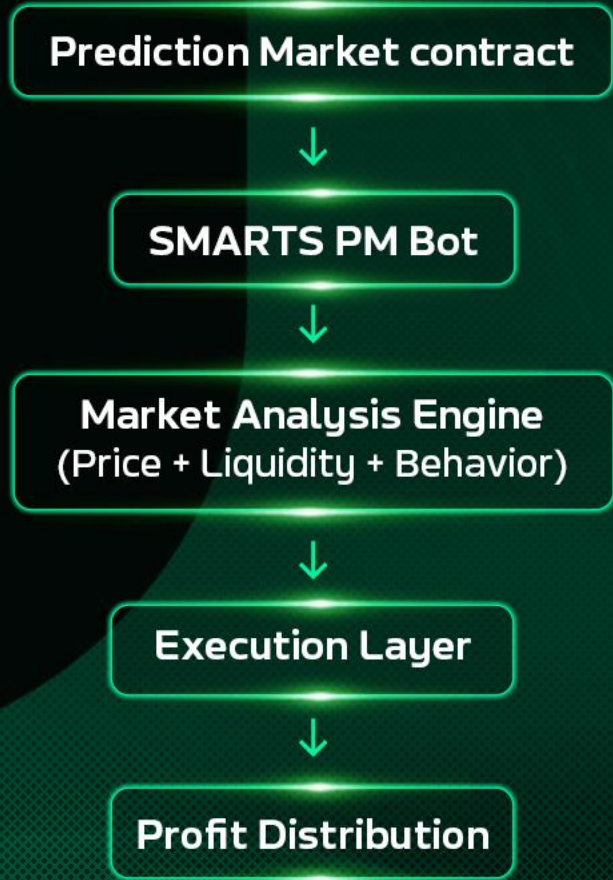

- It continuously evaluates:**
- Market sentiment and price movements
  - Liquidity imbalances across platforms
  - Statistical and behavioral patterns

Based on this, the system makes structured prediction decisions and executes accordingly.

- Users are not required to:**
- Manually predict outcomes
  - Monitor markets
  - Perform any trading actions

Execution is fully automated within SMARTS infrastructure.

The focus is on systematic decision making and controlled execution, not manual speculation.

# SMARTS RANKING STRUCTURE

Rank	Direct Referral Volume	Team Cumulative Volume	Required Referral	Weekly Incentive	Quarterly Pool Reward	Benefits unlocked
V1	\$300	\$1,000	-	-	-	5 community levels
V2	\$1,000	\$3,000	2 x v1	-	-	10 community levels
V3	\$1,500	\$6,000	2 x v2	-	-	15 community levels
V4	\$2,000	\$12,000	2 x v3	-	-	20 community levels
V5	\$3,000	\$25,000	2 x v4	2%	-	20 community levels , Meet Head of Marketing
V6	\$5,000	\$60,000	2 x v5	4%	-	20 community levels , Early Access to All Updates
V7	\$10,000	\$150,000	2 x v6	6%	1%	20 community levels, Private Meeting with Founder
V8	\$20,000	\$500,000	2 x v7	8%	1%	20 community levels , Full Voting & Governance Rights

## TERMS & CONDITIONS

1. Rank eligibility requires meeting the direct referral volume, team cumulative volume and required direct referral
2. Rankings will be reset quarterly
3. Community Level Reward: Direct = 10%, Indirect = 5%

# Weekly Community Pool

**Example:**

- If a team below Rank **V5** generates a total of **100,000 USDT** in sales, the first qualified **V5** upline will receive **2%** of that amount as weekly reward:  
 $100,000 \text{ USDT} \times 2\% = 2,000 \text{ USDT}$
- If there is another **V5** above, both **V5** will share the same total reward from the same sales volume.
- If there is a **V6** above, the **V6** will receive only the difference between **V6** and **V5**, which is an additional **2%** of the same **100,000 USDT**:  
 $(V6 \text{ 4\%} - V5 \text{ 2\%}) = 2\%$   
 $100,000 \text{ USDT} \times 2\% = 2,000 \text{ USDT}$
- The same differential reward logic continues upward to **V7** and **V8**.

**Assumed V4 generated 100,000\$ Sales in total for a week**

Rank Level	Benefit Unlocked	Reward %	Calculation Basis	Reward Amount
<b>V8</b>	<b>8%</b>	<b>2% Differential</b>	<b>V8 receives the difference between V8 and V7</b>	<b>100,000 X (8% - 6%) = 2,000 USDT</b>
<b>V7</b>	<b>6%</b>	<b>2% Differential</b>	<b>V7 receives the difference between V7 and V6</b>	<b>100,000 X (6% - 4%) = 2,000 USDT</b>
<b>V6</b>	<b>4%</b>	<b>2% Differential</b>	<b>V6 receives the difference between V6 and V5</b>	<b>100,000 X (4% - 2%) = 2,000 USDT</b>
<b>If there are 2x V5</b>	<b>2%</b>	<b>Shared 2%</b>	<b>Both V5 share the same total reward from the same sales volume</b>	<b>Each V5 Entitled 1,000 USDT</b>
<b>V5</b>	<b>2%</b>	<b>2%</b>	<b>Qualified V5 receives reward from team sales below V5</b>	<b>100,000 x 2% = 2,000 USDT</b>

# Weekly Community Pool

**Additional Note for V8**

- If a V8 leader has a small team and no one in that team reaches Rank V5 or above, then the V8 will receive 8% directly from the team's total qualified sales volume:  
 $100,000 \text{ USDT} \times 8\% = 8,000 \text{ USDT}$
- The same differential reward logic continues upward to V7 and V8.

**Key Point**

- The stronger your team sales and the higher your rank, the more Weekly Community Reward you can earn.

If no one in the team reached Rank V5 and above  
 Assumed V4 generated 100,000\$ Sales in total for a week

Rank Level	Team Quqlified Sales Volume	Reward %	Calculation	Reward Amount
V8	100,000 USDT	8%	$100,000 \times 8\%$	8,000 USDT
V7	0	6%	No any leader qualified Rank V7	0
V6	0	4%	No any leader qualified Rank V6	0
V5	0	2%	No any leader qualified Rank V5	0

# Quarterly Community Pool

(Available for Rank **V7** & **V8** only)

The Quarterly Community Pool will be displayed at 100%, with:

- 50% allocated to the **V7 Pool**
- 50% allocated to the **V8 Pool**

Contracts contributing to the Quarterly Community Pool

**1%** of the total contract amount will go into the pool for:

- Sandwich **100-day & 180-day** Contract
- Atomic Arbitrage **60-day & 120-day** Contract
- Prediction Market **30-day, 60-day & 90-day** Contract

Example:

If the total Quarterly Community Pool reaches **1,000,000 USDT** by the end of the quarter:

- **V7 Pool = 500,000 USDT**
- **V8 Pool = 500,000 USDT**

If there are **25 Rank V7 leaders**, each leader will receive an average of **20,000 USDT**

If there are **5 Rank V8 leaders**, each leader will receive an average of **100,000 USDT**

## Daily Community Pool

Total Contract Volume	3% Community Pool
500,000	15,000

Everyone who reaches \$1,000 or more in direct sales will share the pool based on their sales volume.

## Rewards Calculations

Users	Daily Direct Sales Volume	Eligible (≥1,000\$)	Rewards amount
A	20,000	Yes	$\$20,000 / \$100,000 \times \$15,000 = \$3,000$
B	10,000	Yes	$\$10,000 / \$100,000 \times \$15,000 = \$1,500$
C	800	No	-
D	70,000	Yes	$\$70,000 / \$100,000 \times \$15,000 = \$10,500$

Total Daily Sales of eligible members = 20,000 + 10,000 + 70,000 = **100,000** (only A, B and D)

Reward Pool = 500,000 × 3% = **15,000**

Each eligible member's reward = **(Their direct sales ÷ 100,000) × 15,000**

# SMARTS Roadmap

Q1

## Solana

### First deployment of Sandwich Bot on Solana

- Tested algorithms, gathered user feedback, and improved core trade logic.
- Laid the groundwork for a more scalable, flexible engine.

Q2

## BSC

### Dual-Network Activation

- Expansion to Binance Smart Chain.
- Boosted trade efficiency, unlocked low-fee MEV capture.

Q3

## EVM Chains

### Multi-Chain Launch

- Extending SMARTS' reach across major ecosystems.
- Broader liquidity access. higher daily returns, tapping into diverse on-chain venues.

Q4

## Atomic Arbitrage

### Atomic Arbitrage

- Atomic arbitrage buys low and sells high in one on-chain transaction. No profit, no execution.

ALL COMPLETED

# 2026 - Taking Flight

**APIs**   
Open APIs to approved partners, enabling ecosystem growth and deeper integrations.

**Enterprise**   
Test, evaluate routes, and co-deploy strategies in a secure sandbox environment.

**Governance**   
Launch of SMARTS Governance, giving the community a direct voice in platform decisions.

**Treasury**   
Launch the SMARTS Treasury, a pool funding security, research, and product improvements.
